**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1-7, the term “absorptive **and** scattering” is not disclosed in the specification.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4, and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Zapata (US5335237).

With respect to claims 1 and 6-7, Zapata shows in Fig.1A a laser gain medium 10 having polished surfaces that are used to transport pump light by internal reflection throughout said laser gain medium 10, a light source (col.3, l.41-41) directing laser pump light into said laser gain medium 10, a layered coating 12 or 14 (col.3, l.16 and 33-36) on at least some of said polished surfaces that are used to transport pump light by internal reflection of said laser gain medium, said layered coating having a reflective inner material and an absorptive or scattering outside material and configured to substantially reflect the pump light that strikes the coating so as to direct the pump light back into said laser gain medium 10, and substantially transmit said amplified spontaneous emission and/or parasitic light

that strikes the coating so as to let this light strike said outside material of said layered coating where it is either scattered or absorbed (see the entire document).

With respect to claims 2, 4, and 8, Zapata discloses a Ge absorbing film (col.4, l.35).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zapata (US5335237) in view of Kawamura et al. (US5856060). Zapata discloses all limitations of the claim except for BaSO<sub>4</sub>. Kawamura teach the BaSO<sub>4</sub> (col.10, l.5). For the benefit of a coating material, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Zapata the BaSO<sub>4</sub> as taught Kawamura.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zapata (US5335237) in view of Ragle et al. (US4891815). Zapata discloses all limitations of the claim except for a roughened surface. Ragle teach a rough surface 11a (Fig.1).
